Click on view modifier group

Every store has its own set of modifiers

Modifier group and modifiers are independently added which later can be associated with each item as per requirements

The screenshot shows the McDonald's POS interface. On the left is a navigation menu with options like 'Create Order', 'Orders', 'Deliveries', 'History', 'Menu', 'Promo code', 'Profile', 'Setting', and 'Earning'. The main area is split into two panels: 'Modifier Group' and 'Toppings'. The 'Modifier Group' panel has a 'View Product' tab selected, and a red box highlights the 'Enter Modifier Group Name' input field with a plus icon. The 'Toppings' panel shows a list of items with their counts and a plus icon to add more.

1 Add Modifier Group
E.g. For pizza toppings can be one modifier group
For Sub, Sauces, Breads etc. can be one modifier groups

2 Add Modifier
E.g. For toppings modifier, jalapeno, olive, tomato, mushroom etc. could be modifier.

Add category

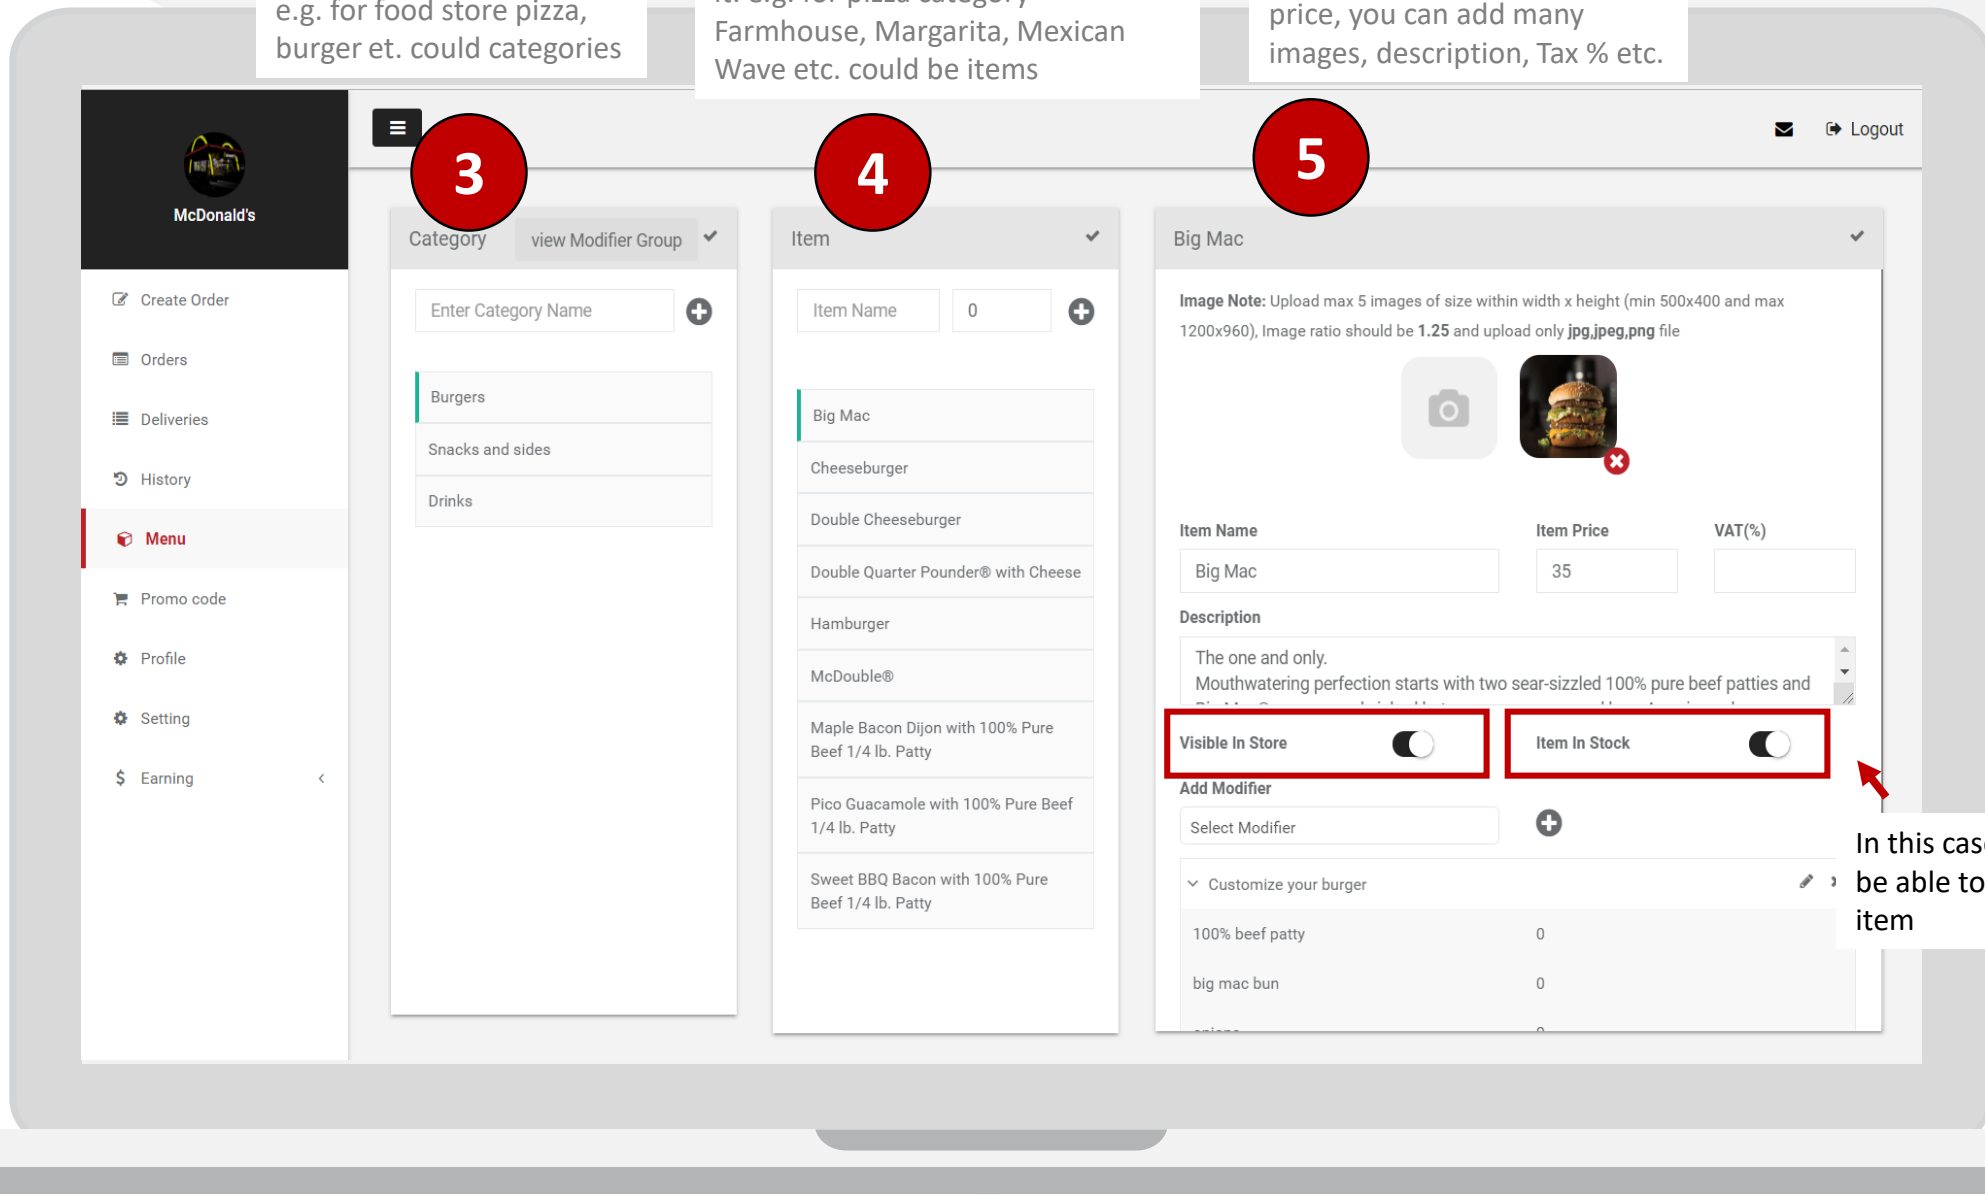

e.g. for food store pizza, burger et. could categories

Add items

Select category & add items inside it. e.g. for pizza category Farmhouse, Margarita, Mexican Wave etc. could be items

Add item details

For added item apart from price, you can add many images, description, Tax % etc.

1

Admin sets what kind of delivery he wants to be in

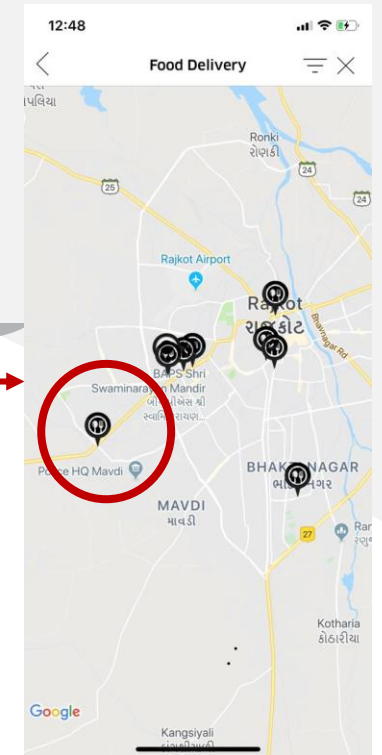

Add delivery type

User app > delivery type list

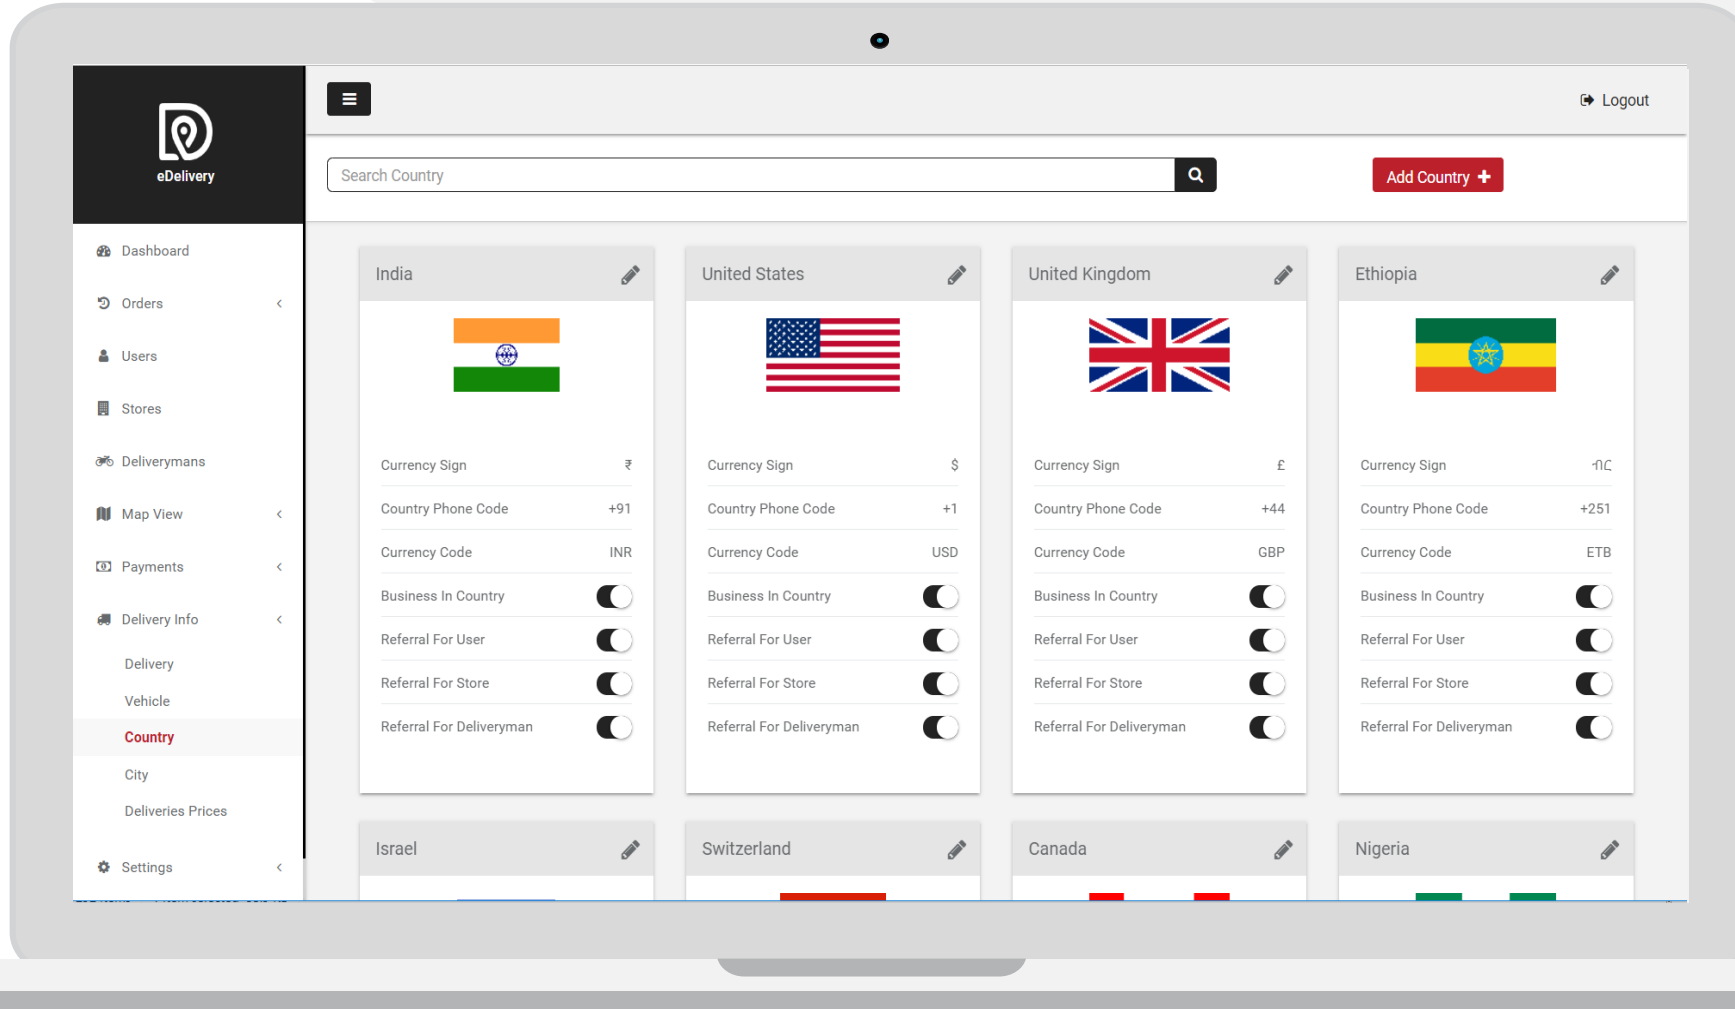

It will show store list in user app in according sequence

User app > Store list > mapview

2

Admin sets country he wants to operate in

set country related parameters

In different country, user is making payment in different currency.

For admin to see all payment in common currency, we are using online function to get exchange rate. But when there is error to get value from it, rate set over here will be used as exchange rate.

Country Data	Referral Setting	Country Setting
Country Name: India	Referral Bonus to User: ₹ 80	Business In Country: <input type="checkbox"/>
Short Code: IN	Referral Bonus to User's Friend: ₹ 100	Distance Unit Mile: <input checked="" type="checkbox"/>
Country Code:	No of User For Referral: 15	Ads Visible: <input type="checkbox"/>
Currency: Ruppes	Referral Bonus to Store: ₹ 100	Referral For User: <input type="checkbox"/>
Currency Code: INR	Referral Bonus to Store's Friend: ₹ 120	Referral For Store: <input type="checkbox"/>
Currency Sign: ₹	No of User For Referral: 12	Referral For Deliveryman: <input type="checkbox"/>
Default Currency Rate: 1 INR To 1 INR	Referral Bonus to Deliveryman: ₹ 120	Auto transfer for store: <input checked="" type="checkbox"/>
Minimum Phone No. Length: 10	Referral Bonus to Deliveryman's Friend: ₹ 150	Auto transfer for deliveryman: <input checked="" type="checkbox"/>
Maximum Phone No. Length: 10	No of User For Referral: 10	

If not mile then km will be used

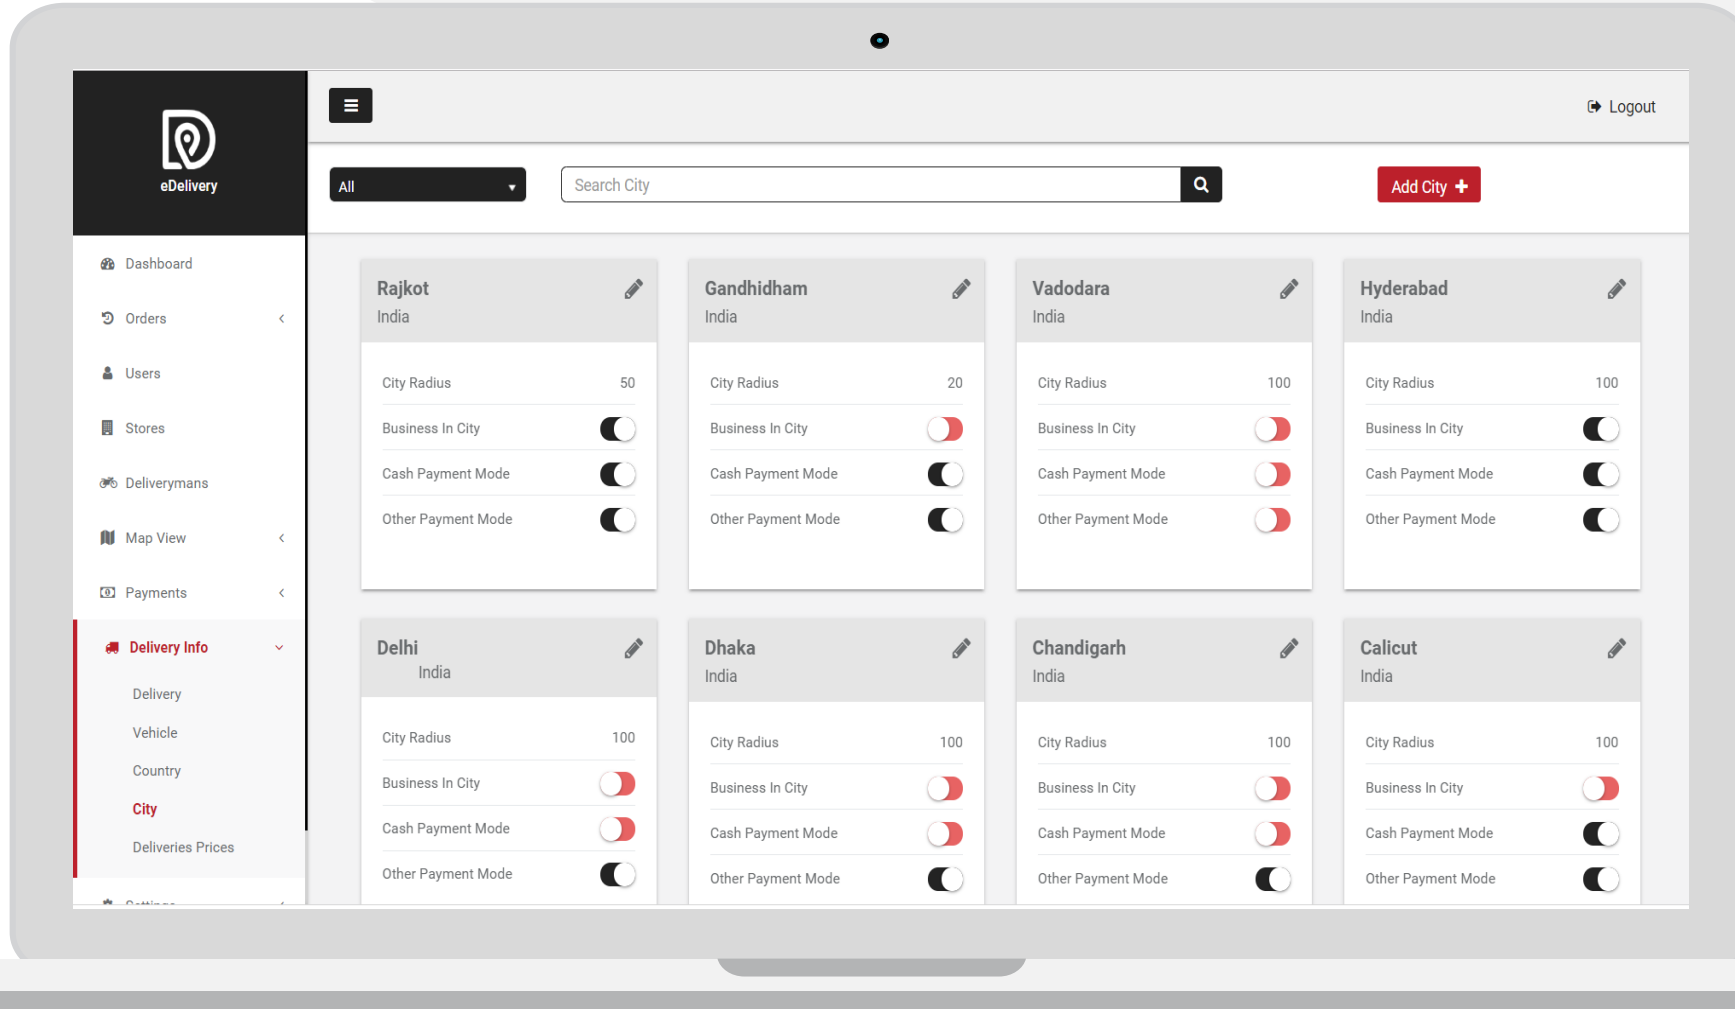

It will display ad in user app based on setting made in advertise tab

- If this is ON, it will automatically settled out payment to store/deliveryman SRTIPE connected bank account.
- If you are not using strip payment gateway please keep it turned off.
- Even if you are using wallet, this feature is not needed so keep it turned off as wallet settles out amount instantly

It will be used for validation in app registration

Payment Gateway

Stripe

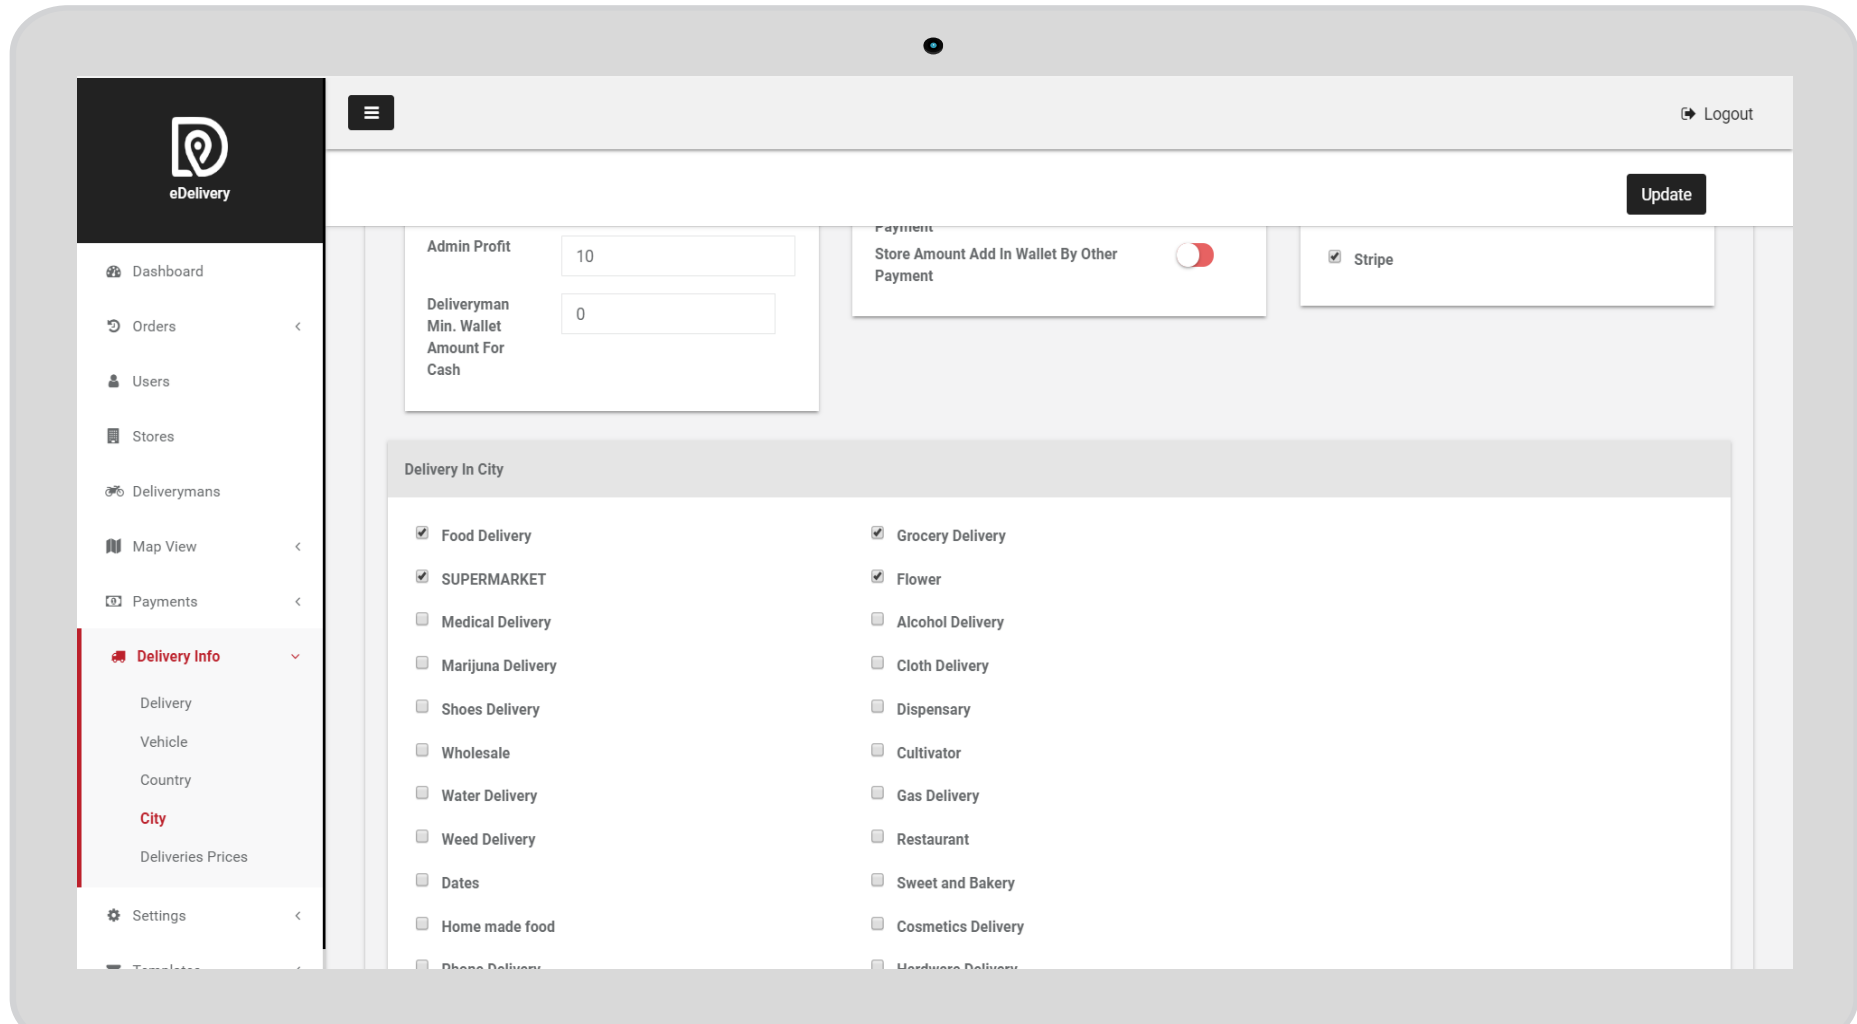

This defines per city what will be admin profit from delivery fee price

From zone tab you can define zones inside city if you want to set zone to zone fix pricing. Keep zone business option ON in that case

If City radius field is ON then only you can define radius and it will take circle of that radius as city boundary. If it is OFF then you can define border of city in map beside by selecting points in random shape rather than circle

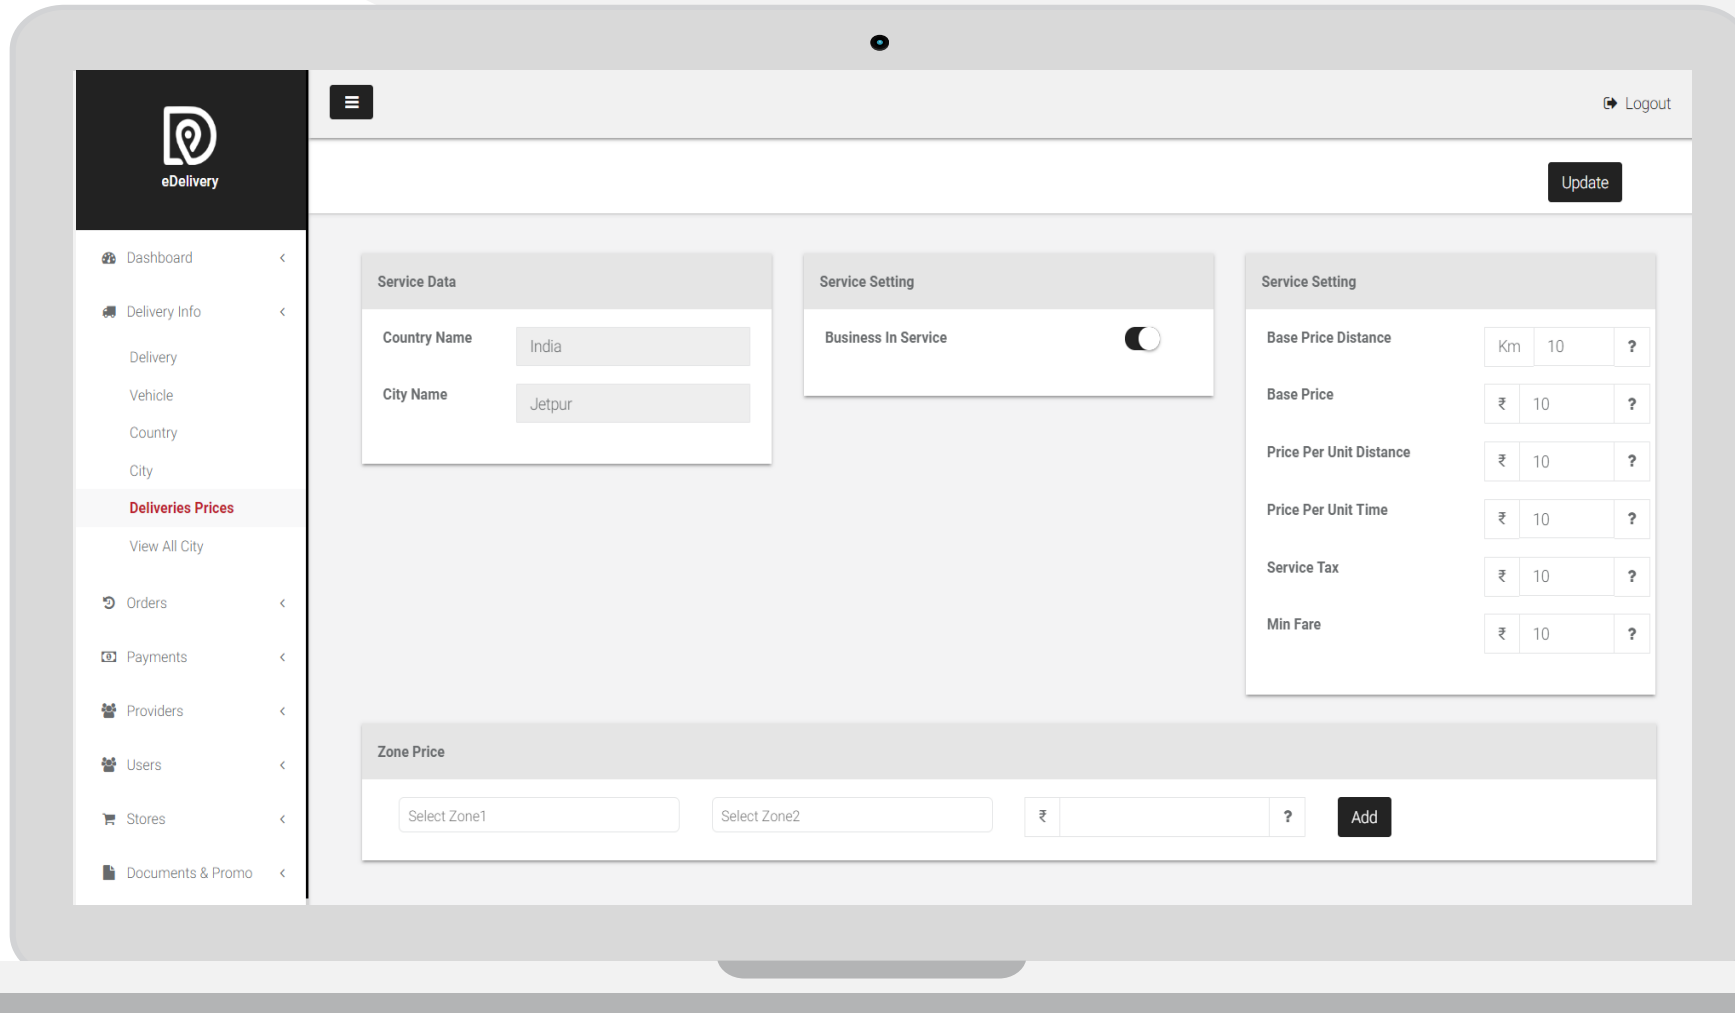

If check for wallet flag is ON then system will check what minimum amount is needed for deliveryman to get new delivery request

Select delivery type which you want to enable in select city

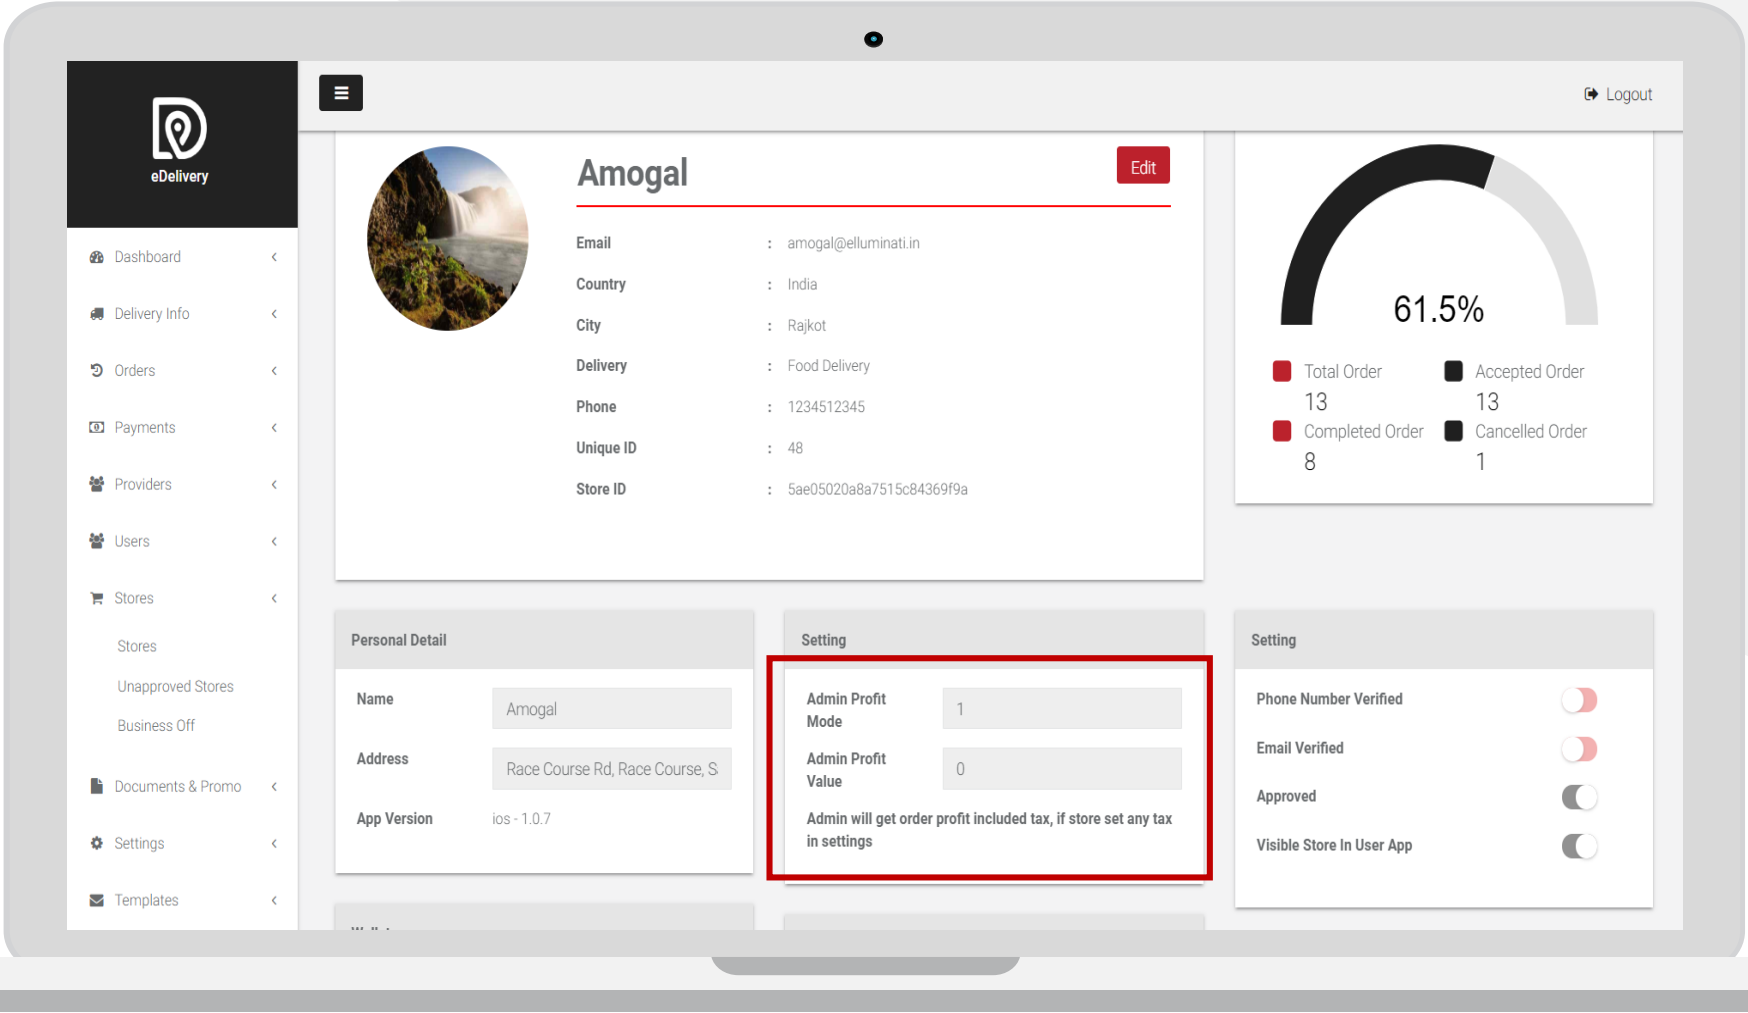

4

Admin sets per city delivery prices which could be flat price or based on distance and time.

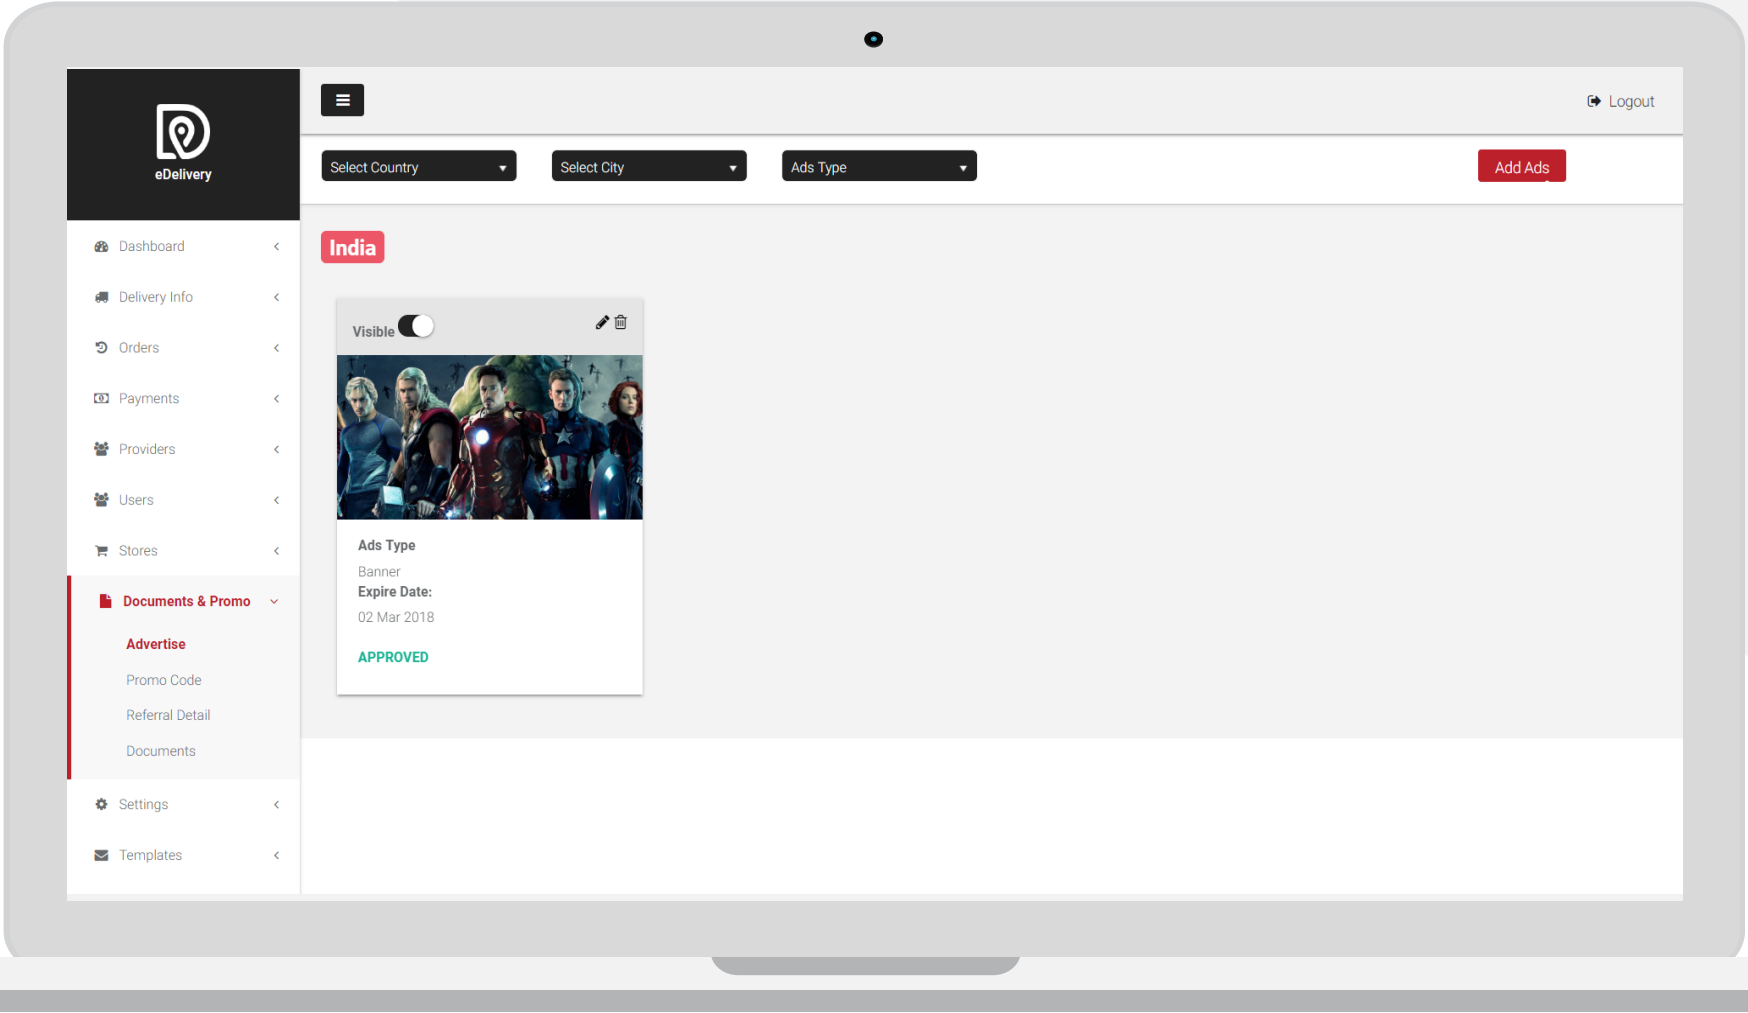

5

Admin sets his profit from per store in store details

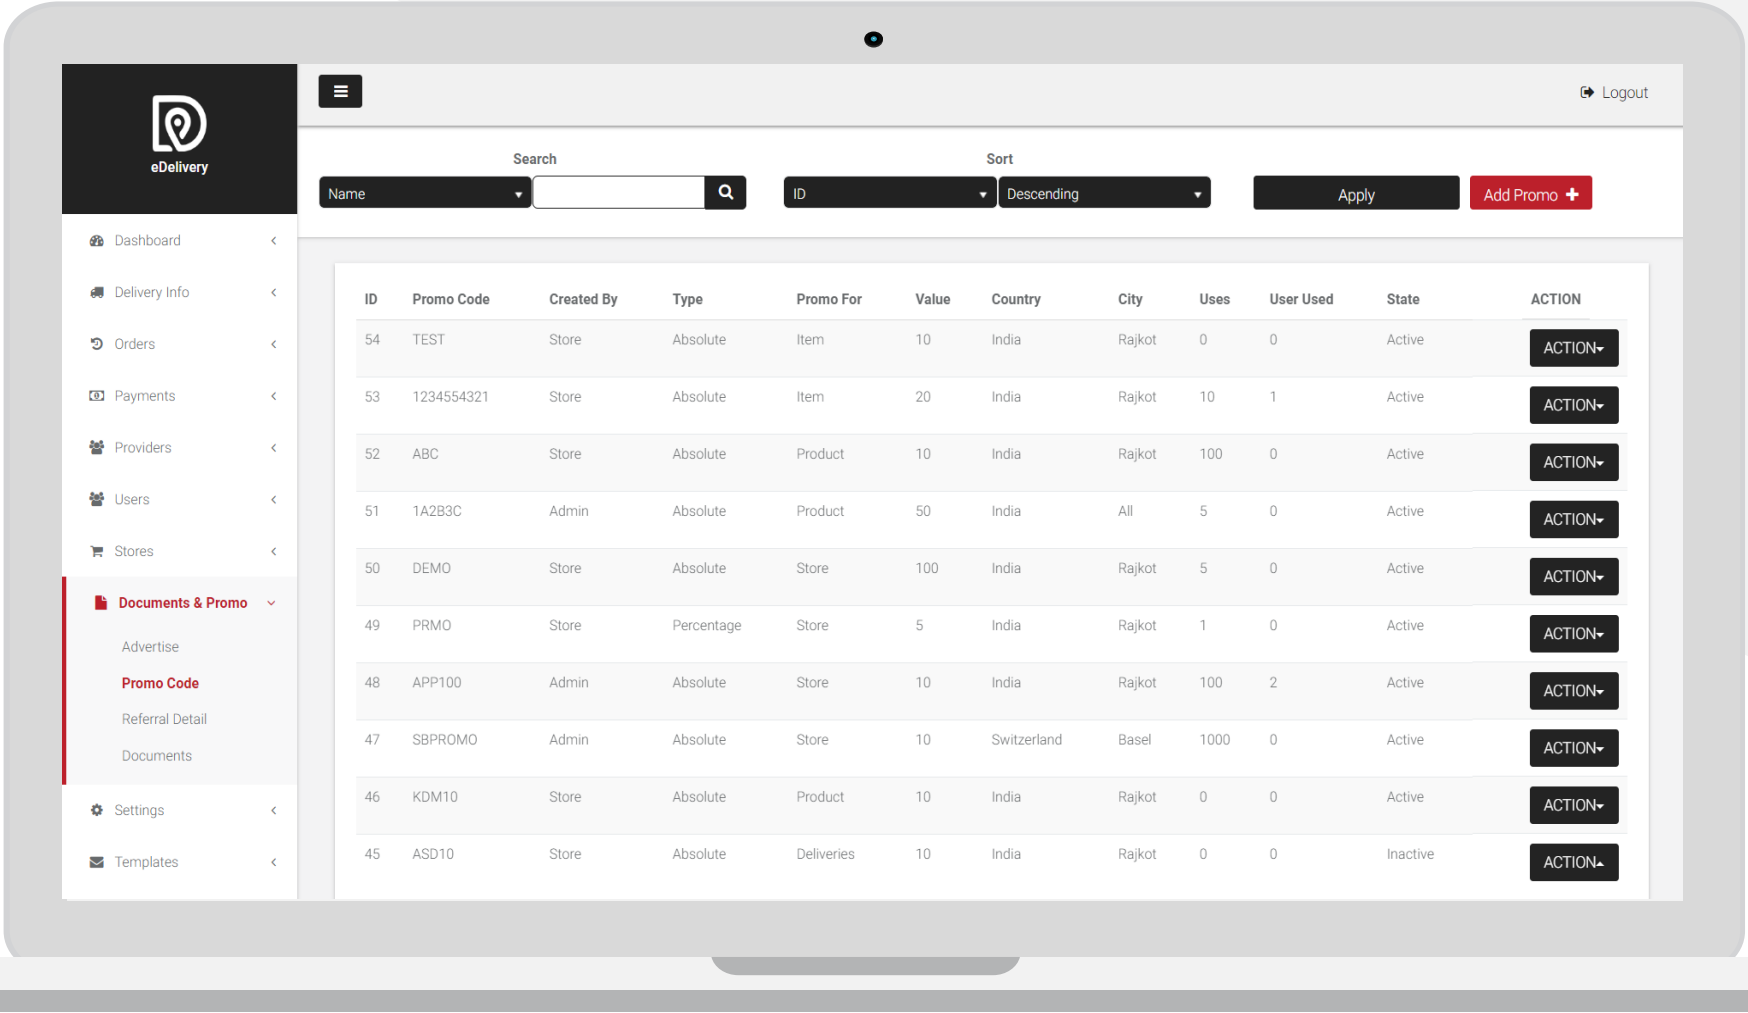

6

Admin sets advertisement from here which will be displayed on user website

7

Admin sets promo code or approves promo created by store

FAQ

How user can reset password?

In login page there is option to forget password. Clicking on which user can enter his email and we will send link to change password on his entered email. User can reset new password from that link.

Do we put in promo codes from the admin site or from the store app?

You can set promo code from admin and store both. Admin can set promo for all stores. Store can set it from himself only. Admin need to accept promo set by store, then only it will be applicable.

Can user schedule order? How?

Schedule order is dependent on store. So, if selected store has enabled it in its settings, it will give schedule option to user for that store at time of checkout. Store can accept schedule order immediately and can work on it later.

How pricing works?

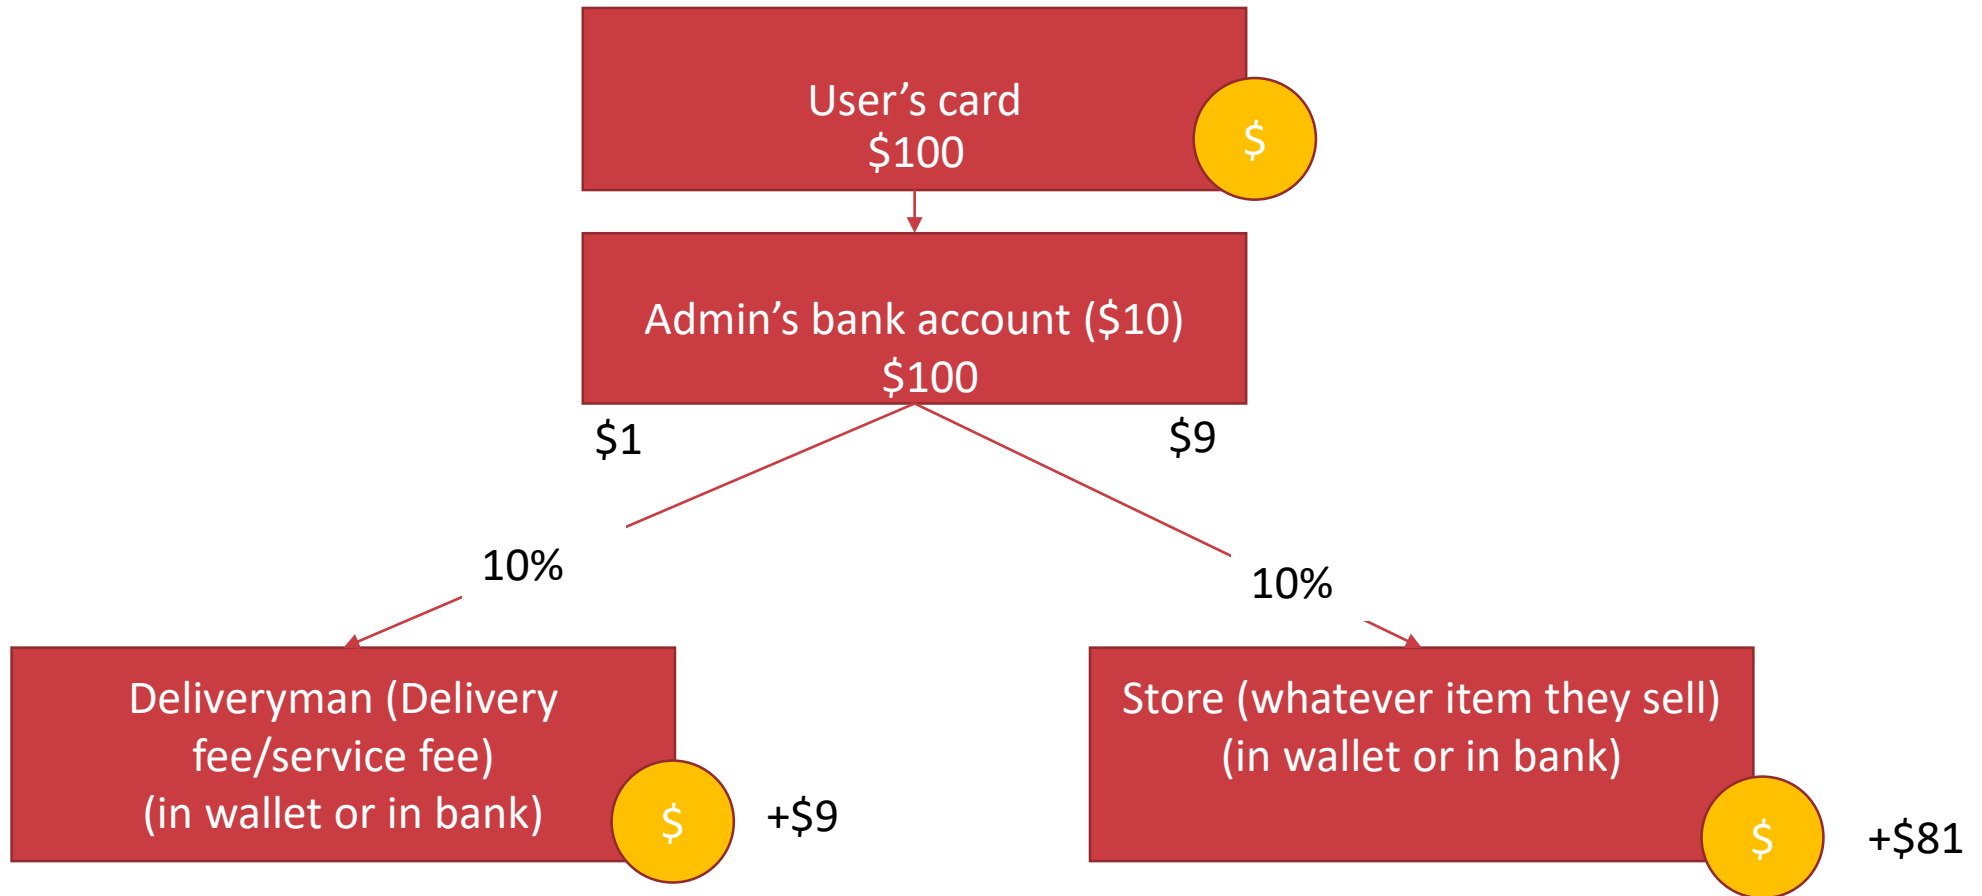

There are two main components of invoice

Service price = Delivery fee (it is set per city wise by admin. You can set it from admin panel -> Delivery info -> City tab)

Item price = Store item amount (it is set per store wise by store. You can set it from admin panel -> Store tab -> Edit store detail.)

How payment flow in case of **CARD/wallet payment**

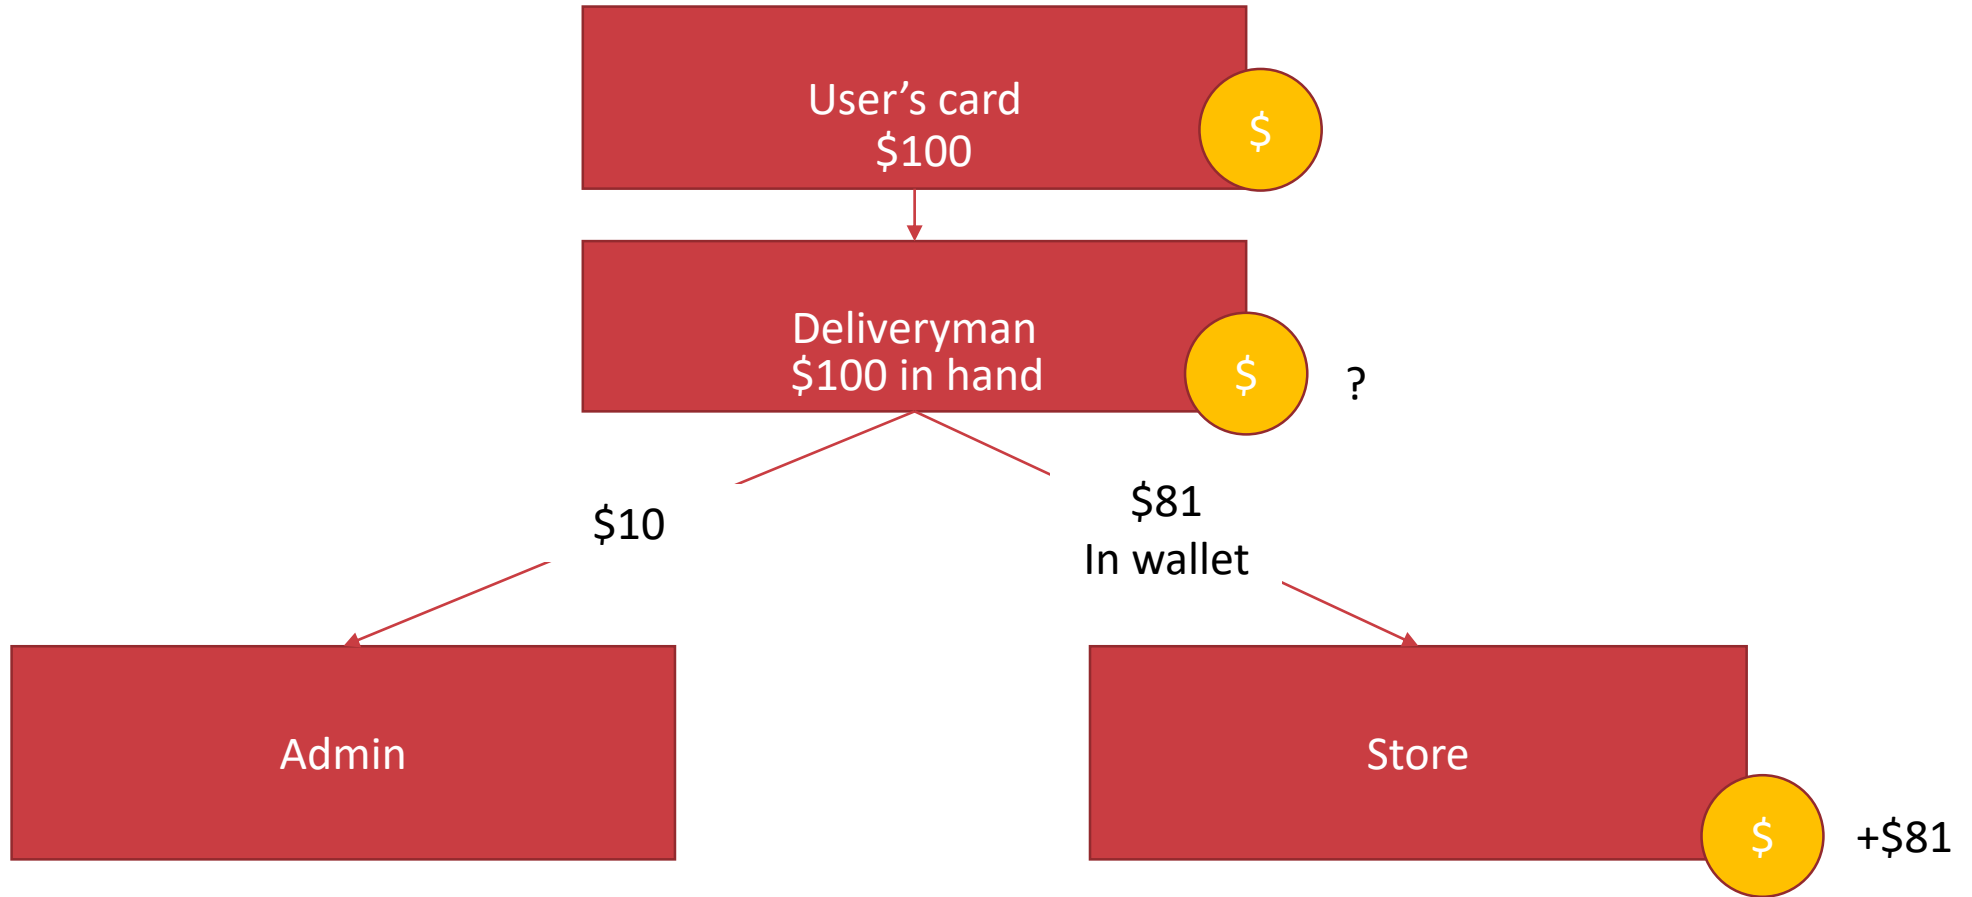

Common ground – payment gateway (Stripe)

If its wallet -> then after every order/transaction, it will be settled
If it is bank -> its daily/weekly/monthly whatever time admin set for auto transfer

How payment flow in case of **CASH** payment

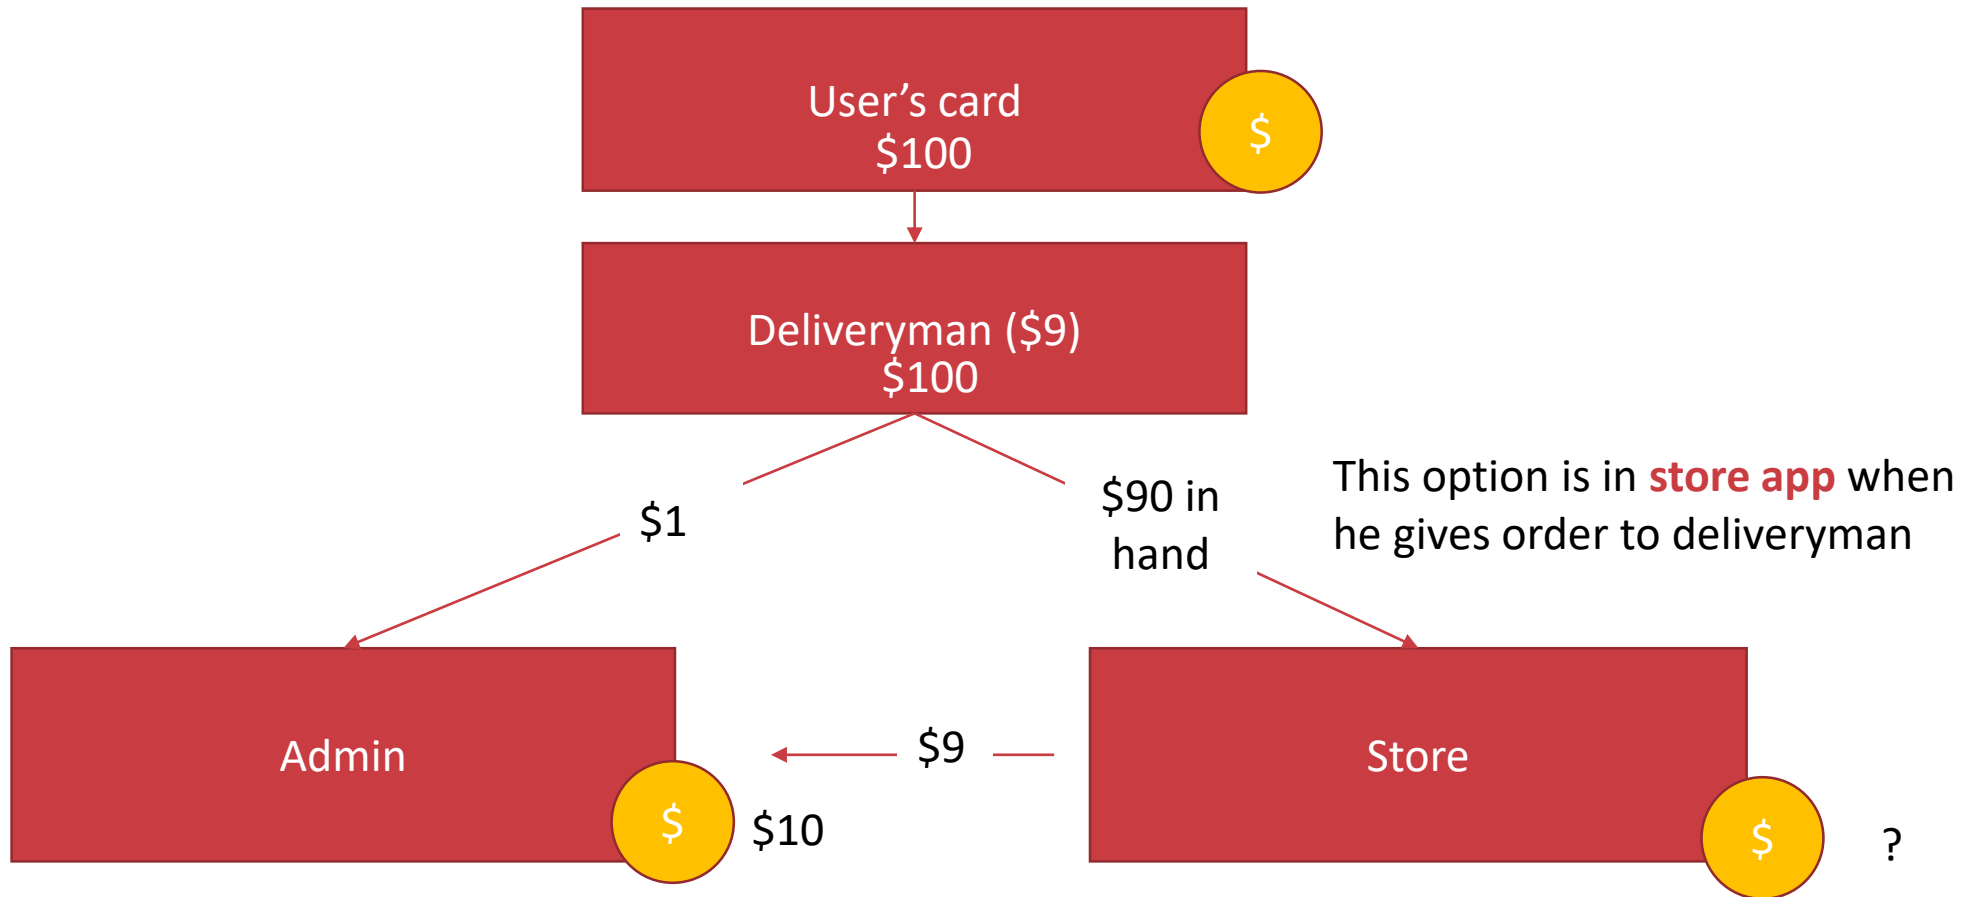

Wallet settlement

If its wallet -> then after every order/transaction, it will be settled
If it is bank -> its daily/weekly/monthly whatever time admin set for auto transfer

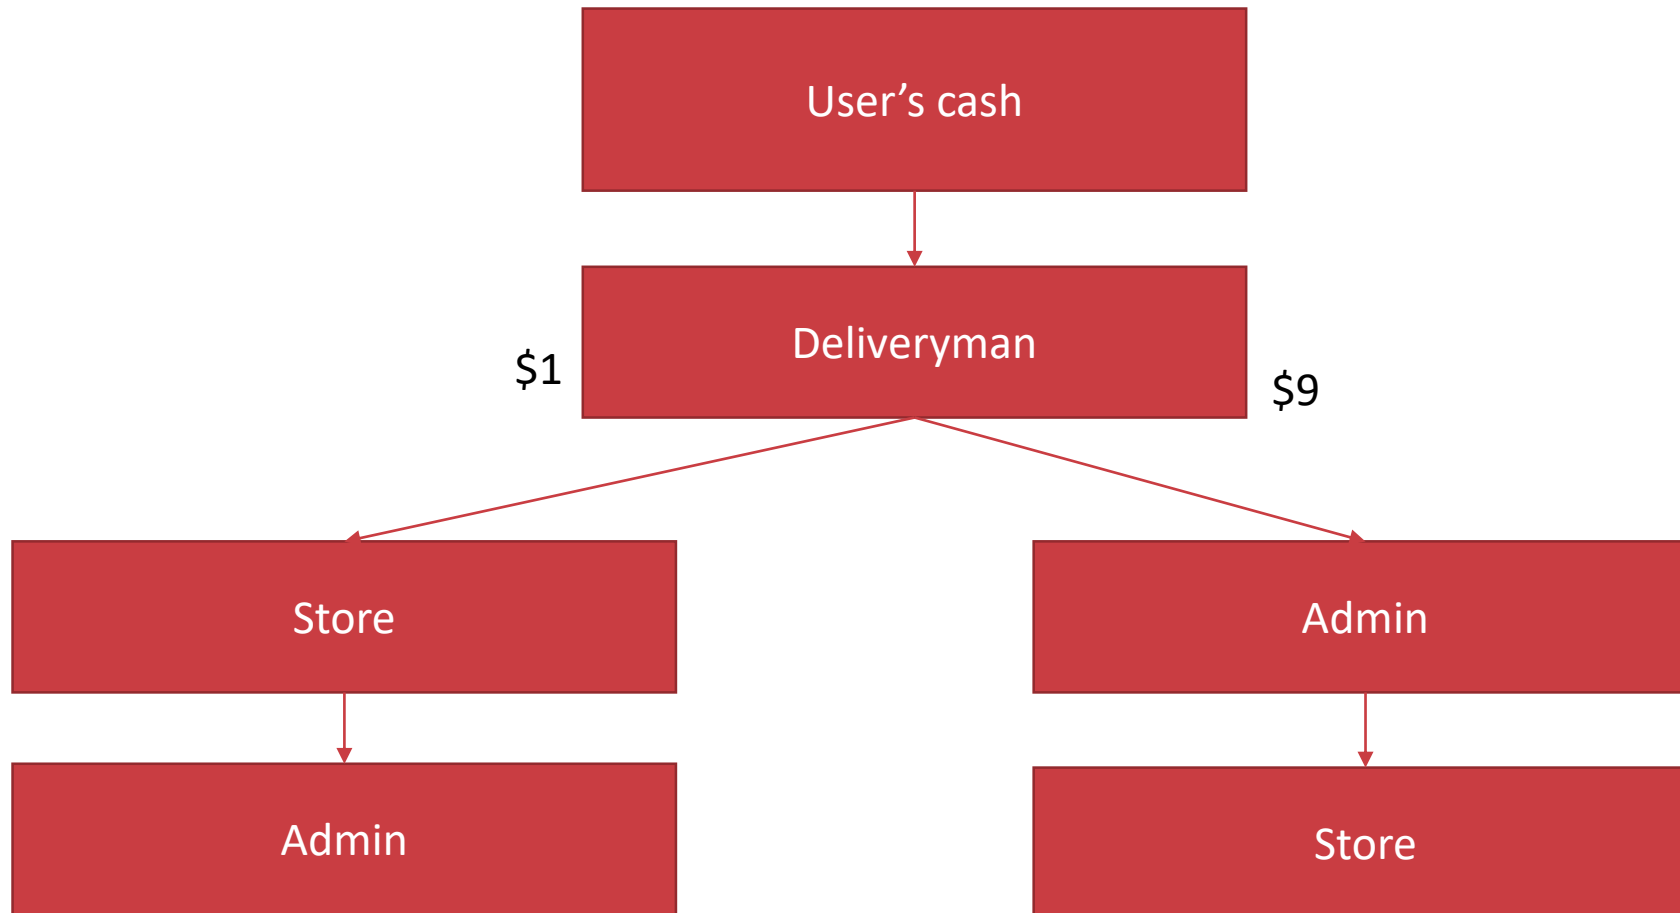

How payment flow in case of **CASH** payment

Deliveryman is paying to store in CASH while collecting items of delivery

If its wallet -> then after every order/transaction, it will be settled
If it is bank -> its daily/weekly/monthly whatever time admin set for auto transfer

How payment flow in case of **CASH** payment

Where can admin set profit from store?

Revenue from Store will be considered on item fee only.

It can be set as % cut of delivery fee or absolute value (fixed amount) per delivery. You can set it in profile mode (see below screenshot)

The screenshot displays an admin dashboard with a sidebar menu on the left and a main content area. The sidebar menu includes: Dashboard, Orders, Users, Stores (highlighted), Menu, Deliverymans, Map View, Payments, Delivery Info (expanded), and Settings. The 'Delivery Info' section is expanded to show: Delivery, Vehicle, Country, City, and Deliveries Prices. The main content area features a search bar, a 'No. of record' dropdown set to 10, and a table of stores. The table has columns for ID, Name, Email, Phone, Country, City, Delivery Type, and Wallet. Below the table is a pagination button labeled '1'. To the right of the table is a profile view for the store 'Fortune', which includes a profile picture, name, and star rating. The profile view has tabs for Details, Documents, Referral, Review, and Bank. The 'Details' tab is active, showing fields for App Version, Address, Website Url, Slogan, Admin Profit Mode (Percentage), and Admin Profit Value (0). The 'Admin Profit Mode' and 'Admin Profit Value' fields are highlighted with a red box. At the bottom of the profile view are buttons for 'View setting' and 'View products'. A 'Logout' link is visible in the top right corner of the dashboard.

Fortune ★ 0

Admin Profit Mode Percentage

Admin Profit Value 0

Where can admin set profit from deliveryman?

Revenue from Deliveryman will be considered on delivery fee only.

It can be set as % cut of delivery fee or absolute value (fixed amount) per delivery. You can set it in profile mode (see below screenshot)

The screenshot displays the eDelivery admin dashboard. On the left is a navigation menu with options: Dashboard, Orders, Users, Stores, Deliverymans, Map View, Payments, Delivery Info (expanded to show Delivery, Vehicle, Country, City, Deliveries Prices), and Settings. The main content area is divided into three sections: City Data, City Setting, and a Map view. The City Data section includes fields for Country (India), City Name (Rajkot), Nick Name (Rajkot, Gujarat, India), City Code (GJ), City Radius (50 Km), Latitude (22.3038945), Longitude (70.8021599), and Timezone (Asia/Kolkata). The City Setting section contains various toggle switches for Business In City, Cash Payment Mode, Other Payment Mode, Zone Business, Use Radius, Promo Apply, Ads Visible, Check Wallet Amount For Cash, and Deliveryman Amount Add In Wallet By Cash Payment, Other Payment, and Store Amount Add In Wallet By Cash Payment. The Map view shows a map of Rajkot with a circular delivery zone. A red box highlights the 'Profit Mode' (set to Percentage) and 'Admin Profit' (set to 10) fields in the City Data section. A callout box on the left states: 'This defines per city what will be admin profit from delivery fee price'. An 'Update' button is located at the top right of the City Data section.

Field	Value
Country	India
City Name	Rajkot
Nick Name	Rajkot, Gujarat, India

Pan card		
Adhaar card		
Licence		
Emirates ID		

View setting View products

For store/user/deliveryman to upload documents, admin needs to mention list of required documents. Admin can do it with below actions

Admin panel -> Settings -> Documents -> Add document

ID	Name	Country	Type	Option	ACTION
105	Emirates ID	India	Store	Optional	ACTION-
104	Licence	India	Store	Optional	ACTION-
103	Adhaar card	India	Store	Optional	ACTION-
102	Pan card	India	Store	Optional	ACTION-
101	Commercial Lincense	India	Store	Optional	ACTION-
13	ID proof	India	User	Mandatory	ACTION-
12	Bank statement	India	User	Optional	ACTION-
11	Passport	India	User	Mandatory	ACTION-
10	Trademark Document	India	User	Optional	ACTION-
9	Stamp ID	India	User	Mandatory	ACTION-

It will open new page where admin can define required documents, and select this documents is for whom.

For deliveryman's vehicle we have separate section in itself.

Document Data

Country: Select Country

Name:

Name Required:

Type: Deliveryman

Visible: Store

Mandatory: Deliveryman

Expire Date: Deliveryman Vehicle

Unique Code:

Mandatory: If this option is ON, particular store/user/deliveryman wont able to user app further till he adds mandatory document.

Unique code: if this option is ON, system will ask user to enter unique code separately with document. For example, with license ID photo, driver is supposed to enter license ID code manually

Expiry date: if this option is ON, system will ask user to enter expiry date manually for attached document so system can expire his account on this date is document is not renewed.

How do we set up advertisements? It will not allow us to upload any images
To show advertisement to user, go to admin panel -> Settings -> Advertise -> Add ads

The screenshot displays the admin panel interface. On the left, a sidebar menu contains various options: Dashboard, Orders, Users, Stores, Deliverymans, Map View, Payments, Delivery Info, **Settings** (circled in red), and Templates. Under the 'Settings' menu, there are sub-items: Admin Settings, **Advertise** (circled in red), Promo Code, Referral Detail, Documents, and Admin. The main content area shows the 'Advertise Data' form with the following fields:

- Country**: A dropdown menu with the placeholder text 'Select Country' and a red error message 'Select Country First' below it.
- City**: A dropdown menu with the placeholder text 'Select City'.
- Detail**: A large text area for entering details.
- Ads Type**: A dropdown menu with the selected option 'Banner'.
- Ads For**: A dropdown menu with the placeholder text 'Select an Option'.
- Visible**: A toggle switch that is currently turned on (red).
- Approved**: A toggle switch that is currently turned on (red).
- Expiry Date**: A toggle switch that is currently turned off (black).
- Expiry Date**: A text input field for specifying the expiry date.
- Redirect To Store?**: A toggle switch that is currently turned off (black).
- Store**: A dropdown menu with the placeholder text 'Select Store'.
- Banner Image**: A section for uploading a banner image, which is currently empty.

Can you help me with the reporting component of the admin panel?

In whichever tab, you see below icon, clicking on it, it will let you download CSV file for all data. CSV format is same as Excel

The screenshot shows the eDelivery admin panel interface. On the left is a sidebar with navigation options: Dashboard, Orders (selected), Deliveries, History, Cancelled Delivery, Users, Stores, Deliverymans, Map View, Payments, Delivery Info, Settings, and Templates. The main content area features a search bar and filters for Status, Payment Mode, Pick up, Order Type, and Created By. Below these is a table of orders with columns for ID, Start Date, User, Store, Status, Amount, Payment By, and Action. A red box in the top right corner highlights a download icon (a document with a downward arrow).

What is difference between referral code and promo code?

Referral Code	Promo code
Referral bonus is marketing by users themselves.	Promotional bonus is marketing by admin.
Admin sets referral bonus from admin panel for those who share referral code and those who use referral code to register.	Admin sets promo code with absolute or percentage value and share among user with different communication medium like website, SMS, email etc.
Unique referral code for each user will be generated automatically when they register.	Many people can use same promo code to claim discount.
User can apply referral code only once when they register.	User can apply different promo code every time they make order.
One referral code can be shared with many friends to get bonus. [This limit will be set by admin]	One promo code can be used only once to claim discount
Referral credit will be added to your wallet which you can use anytime.	One promo can be used for one order only. If amount is still left, you cant use it for next order.

How referral system works?

We have referral system for all 3 types of user.

- User can invite another user.
 - Store can invite another store.
 - Deliveryman can invite another deliveryman.
1. Country wise you can set amount what person who are sharing will get and what person who are using shared referral will get.
 2. When use register using shared referral number, he and whoever's referral code he is using will get mentioned amount of bonus.
 3. This referral bonus amount will be added to respective user's wallet which he can use for next order.
 4. Be it card payment or cash payment, wallet amount will be deducted first if it is ON from settings.

How referral system works?

The screenshot displays the eDelivery admin interface. On the left is a sidebar with navigation options: Dashboard, Orders, Users, Stores, Deliverymans, Map View, Payments, Delivery Info, Country (highlighted), City, Deliveries Prices, and Settings. The main content area is divided into three sections: Country Data, Referral Setting, and Country Setting. The Referral Setting section is highlighted with a red border and contains the following fields:

Field	Value	Unit	Limit
Referral Bonus to User	80	₹	?
Referral Bonus to User's Friend	100	₹	?
No of User For Referral	15		?
Referral Bonus to Store	100	₹	?
Referral Bonus to Store's Friend	120	₹	?
No of User For Referral	12		?
Referral Bonus to Deliveryman	120	₹	?
Referral Bonus to Deliveryman's Friend	150	₹	?
No of User For Referral	10		?

The Country Setting section includes toggle switches for: Business In Country, Distance Unit Mile, Ads Visible, Referral For User, Referral For Store, Referral For Deliveryman, Auto transfer for store, and Auto transfer for deliveryman. The 'Referral For User', 'Referral For Store', and 'Referral For Deliveryman' toggles are highlighted with a red box. A red arrow points to the 'No of User For Referral' field in the Referral Setting section.

Update

Make sure it is turned on if you want to use referral.

Admin can even set limit in admin panel that with max how many people user can share his referral code to limit your marketing budget
